

I am responding to the possible "rule changing" of media ownership. I find it quite unfear and distrubing that the American public was not made more aware of this months ago through the major media outlets. This is an issue that is massively important to the American public. America is made up of many different ethnic backgrounds and cultures, yet the media as we know it now, does not reflect that in any meaning of the word DIVERSITY! If this "rule change" goes through we will have even less of a deverse voice to the general public (the American people)! The way the whole issue has been pushed through to this point without the American people being able to discuss the matter, I find ALARMING! As an American
To: FCC Chair Michael Powell
Re: Monday vote on Media Consolidation

Dear Chairman Powell

I would like to add my voice to the chorus of messages asking you to delay the vote on this important issue pending further hearings involving public input and debate.
Our freedom in this country depends on an informed electorate.
Shrinking the number of corporations owning media can only shrink diversity of opinion to the detriment of our democracy.
We are watching you.
